

Are you driven by the ability to work and develop in a fast-paced environment, learn rapidly and master diverse web technologies? Keep on reading because we're hiring:

Web Frontend Developer

The position focuses on developing best practices in frontend applications and we're looking for a competent ambitious individual to join our team and work on challenging international projects.

Responsibilities:

- Developing new user-facing solutions and features
- Ensure technical feasibility of UI/UX designs
- Writing well-designed, testable, efficient code
- Cooperating closely with UX/UI Designers, Backend Developers and Project Management
- Handling multiple tasks within the constraints of timelines and budgets

Required:

- Excellent understanding of HTML/CSS and PostCSS
- Minimum 2 year of experience working with JavaScript
- At least a web app or two under your belt
- Comprehension of web application development, web performance, SEO and how browsers work
- Keeping up with latest web development news and technologies

Bonus:

- Knowledge of Vue.JS frontend framework
- Experience with the WordPress
- Degree in computer science; however, your experience and proven skills are more important

What we offer:

- Modern workstation in Zagreb, Varaždin or Osijek
- Flexibility working schedule and possibility to work from home
- Competitive salary dependent upon experience
- Interesting projects in various domains
- Nice colleagues willing to help
