

Are you excited by enterprise-level software engineering and striving for simple solutions for complex problems? Do you want to be part of an exciting journey? Keep on reading because we're hiring:

Senior Software Developer/Engineer

Take your career to the next level and contribute to the development of a strategic technological vision and direction. Become a part of a new Software Engineering and Big Data dedicated team in Croatia that will work on international large-scale enterprise projects. The position focuses on building state-of-the-art software architecture, tech-stack and best practices that interact with complex databases running big data workloads in production at scale.

Responsibilities and tasks include:

- Define, implement and improve technical architectures and design processes that support engineering consistency and efficiency of development practices.
- Write well-designed, testable, efficient code, develop new solutions, features and improve existing systems
- Work closely with Product Owners, Software Engineers and Data Analysts with the aim of meeting current and future user needs
- Understand and explain advantages and disadvantages of the proposed solutions to internal and external stakeholders at different levels
- Keep up with trends and evolving technology, write announcements, blog posts and technical documentation.

Requirements expected:

- Degree in Computer Science or Engineering; however, your professional experience and proven skills are more important
- Proficiency in at least one programming language (e.g. Java, Kotlin, Scala, C#, Python)
- Software engineering (micro services, design patterns, version control, automated testing, concurrent programming etc.)
- Comprehension of Relational databases, Graph databases and experience with at least one Cloud provider (e.g. Azure, AWS, GCP)
- Nice to have:
 - Tools: Container, Kubernetes, Databricks, Pandas, Spark
 - Experience in Big Data and Machine Learning

What we offer:

- Continuous education and improvement by working on large-scale projects for international corporations with some of the most skilled people in the industry sector
- Modern workstation in Zagreb, Varaždin or Osijek
- Flexible working schedule and a possibility to work from home
- Competitive salary depending on experience
