

Are you driven by making technology work better and simplifying everyday life with innovative and user-friendly software applications? Ready to challenge your fellow developer colleagues? Keep on reading because we're hiring:

## Quality Assurance Engineer / Software Tester (m/f)

Take your career to the next level by working in an agile software engineering team, covering the complete lifecycle of development activities from planning to delivery. You will collaborate closely with the design, development, and project/product teams to ensure efficiency, reliability and quality of all components and features developed as well as quick response to requirements changes. Your keen eye for details and pride in finding imperfections provides excellent digital products – and makes our clients and users happy.

### Responsibilities and tasks include:

- Testing and re-testing software applications, features and change requests across several platforms and technologies (mobile, web, desktop etc.).
- Analyzing user-stories, change requests and technical specifications for validity and feasibility, as well to ensure testing activities meet business and client requirements.
- Creating and executing test-cases/plans/scripts and acceptance reports.
- Reporting, escalating and communicating issues (ex. track defects in JIRA), working closely with project/product team to resolve issues and deliver high value for customers.
- Providing support and documentation, proactively suggest improvements to increase quality and user experience
- Knowledge sharing and keeping up with trends and evolving technology

### Requirements expected:

- Degree in Computer Science or Engineering; however, your professional experience and proven skills are more important
- Experience in functional and non-functional software testing
- Strong troubleshooting skills combined with effective planning, organization and commitment to getting the job done and perfect
- Impeccable attention to detail with a sense of user interface and experience
- Nice to have:
  - Experience in automation testing, system testing, integration testing, regression testing, performance testing, usability and compatibility testing.
  - Knowledge of API Testing (e.g. Postman, REST, SOAP etc.) and querying databases would be beneficial
  - German speaking is a plus (must-have: excellent in English)

### What we offer:

- Continuous education and improvement by working on a variety of projects with some of the most skilled people in the industry sector
- Modern workstation in Zagreb, Varaždin or Osijek
- Flexible working schedule and a possibility to work from home
- Competitive salary depending on experience
