

Are you passionate about full-stack engineering and excited to build applications that integrate AI models into enterprise systems? Do you want to work on impactful projects in a modern on-prem data-center environment? Keep on reading because we're hiring:

## Full-Stack Engineer (with AI Expertise)

Join our engineering team working on AI-driven enterprise initiatives for a major German IT service provider. You will develop applications, services and integration layers that make AI models usable in production and support the optimization of data-center operations.

### Responsibilities:

- Develop applications, tools and services that integrate AI models into enterprise workflows
- Build web UIs, dashboards and operational tools for data-center use cases
- Implement APIs (REST/GraphQL), microservices and service layers interfacing with AI models
- Support the deployment and operation of AI models within an on-prem environment
- Ensure scalability, maintainability, security and reliability in an enterprise context
- Collaborate with AI engineers, architects and data-center operations teams
- Produce documentation and guide teams through the technical lifecycle of each use case

### Your Profile:

- 3–7+ years of experience as a full-stack developer
- Strong skills in JavaScript/TypeScript (Node.js, React or Angular)
- Backend experience in Node.js, Java (Spring Boot) or Python
- Experience building APIs and microservices architectures
- Understanding of AI/ML concepts and integration of models through APIs or on-prem endpoints
- Experience with containerization (Docker) and ideally Kubernetes
- Familiarity with CI/CD pipelines and modern DevOps practices
- Knowledge of relational and NoSQL databases
- Experience in enterprise environments and agile teams
- Very good English skills (C1); German is a plus
- Nice to have:
  - Experience with AI/LLM features or AI-assisted applications
  - Basic knowledge of security, identity, or monitoring in enterprise systems

### What we offer:

- Continuous education through large-scale enterprise projects with highly skilled engineering teams
- Modern workplaces in Zagreb, Varaždin or Osijek
- Flexible working schedule and option to work from home
- Competitive salary depending on experience

If this sounds like a good fit, apply now - we would be happy to chat with you:
